

# Microsoft BingVoiceRecognizer

- **Web site** : <https://www.microsoft.com/cognitive-services/en-us/speech-api>

Convert spoken audio to text. The API can be directed to turn on and recognize audio coming from the microphone in real-time, recognize audio coming from a different real-time audio source, or to recognize audio from within a file. In all cases, real-time streaming is available, so as the audio is being sent to the server, partial recognition results are also being returned.

- **Configuration** :

**voximal.conf**

```
[recognizer]
API : microsoft
key : (your private key)
```
