

Hyphenate

About

HYPHENATE INC

156 2nd St, San Francisco, CA 94105

Website: <https://www.hyphenate.io/>

Definition

Hyphenate is a cloud-based PaaS (Platform as a Service) for Mobile Instant Messaging (MIM). We provide in-app messaging features such as one-to-one chat, group chat, voice message, picture/video/file sharing, location sharing, real-time voice/video calling, etc.

We created Hyphenate MIM so you can focus on engaging your users. Our goal is to help you deliver an outstanding in-app messaging experience without having to suffer the pain and hefty resource commitment of building an entire IM backend infrastructure. We have mobile SDKs for Android, iOS, and Javascript Web SDK, and we offer a full REST API and Webhooks API for integrating your server backend with the Hyphenate service.
