Connect to your AC2 Dashboard

A screenshot of the AWS console homepage in French. The header includes the AWS logo, navigation links like "Menu", "Mise en route", "Produits", "Solutions", and "Plus", and user options like "Français", "Mon compte", and "Créer votre compte". The main banner area has a green background with the text "Créez votre premier projet avec AWS en utilisant nos guides étape par étape." and a "Voir les projets" link. To the right, there's a box for "Gérez vos ressources" with a "Se connecter à la console" button and information about the "Application mobile AWS Console". Below the banner, there are four service tiles: "AMAZON API GATEWAY", "AMAZON ECS", "AWS KEY MANAGEMENT SERVICE", and "AMAZON SNOWBALL", each with an icon and a brief description in French.

The screenshot displays the AWS Management Console's EC2 Dashboard. The left-hand navigation pane lists various services under categories like INSTANCES, IMAGES, ELASTIC BLOCK STORE, NETWORK & SECURITY, LOAD BALANCING, AUTO SCALING, and COMMANDS. The main content area is titled 'Resources' and shows a summary of EC2 resources in the EU Central (Frankfurt) region: 0 Running Instances, 0 Elastic IPs, 0 Dedicated Hosts, 0 Snapshots, 0 Volumes, 0 Load Balancers, 1 Key Pairs, and 2 Security Groups. Below this, there's a section for 'Create Instance' with a note about launching instances in the EU Central (Frankfurt) region and a 'Launch Instance' button. To the right, the 'Account Attributes' section lists supported platforms (VPC, Default VPC, vpc-taffe773), resource ID length management, and additional information links (Getting Started Guide, Documentation, All EC2 Resources, Forums, Pricing, Contact Us). At the bottom, the 'Service Health' section indicates that the EU Central (Frankfurt) service is operating normally across all availability zones.

- Click the **[Launch Instance]** button.
- Select **[Community AMIs]**
- Enter in the search fiell : **voxibot**
- Select the lastes Voxibot AMI by pushing the **[Select]** button.

Step 1: Choose an Amazon Machine Image (AMI)

An AMI is a template that contains the software configuration (operating system, application server, and applications) required to launch your instance. You can select an AMI provided by AWS, our user community, or the AWS Marketplace; or you can select one of your own AMIs.

Quick Start | My AMIs | AWS Marketplace | **Community AMIs**

Operating system

- ☐ Amazon Linux
- ☐ Cent OS
- ☐ Debian
- ☐ Fedora
- ☐ Gentoo
- ☐ OpenSUSE
- ☐ Other Linux
- ☐ Red Hat
- ☐ SUSE Linux
- ☐ Ubuntu

Search:

Launch next steps

Step 2: Choose an Instance Type

Amazon EC2 provides a wide selection of instance types optimized to fit different use cases. Instances are virtual servers that can run applications. They have varying combinations of CPU, memory, storage, and networking capacity, and give you the flexibility to choose the appropriate mix of resources for your applications. [Learn more](#) about instance types and how they can meet your computing needs.

Filter by: **All instance types** | **Current generation** | [Show/Hide Columns](#)

Currently selected: t2.micro (Variable ECUs, 1 vCPUs, 2.5 GHz, Intel Xeon Family, 1 GiB memory, EBS only)

	Family	Type	vCPUs	Memory (GiB)	Instance Storage (GB)	EBS-Optimized Available	Network Performance
<input type="checkbox"/>	General purpose	t2.nano	1	0.5	EBS only	-	Low to Moderate
<input checked="" type="checkbox"/>	General purpose	t2.micro <small>Free tier eligible</small>	1	1	EBS only	-	Low to Moderate
<input type="checkbox"/>	General purpose	t2.small	1	2	EBS only	-	Low to Moderate
<input type="checkbox"/>	General purpose	t2.medium	2	4	EBS only	-	Low to Moderate
<input type="checkbox"/>	General purpose	t2.large	2	8	EBS only	-	Low to Moderate
<input type="checkbox"/>	General purpose	m4.large	2	8	EBS only	Yes	Moderate
<input type="checkbox"/>	General purpose	m4.xlarge	4	16	EBS only	Yes	High

You can skip the fine tune option to directly launch the instance, so you will configure your Security group here are later from the Dashboard :

- Open TCP / SSH port : 22
- Open TCP / HTTP port : 80
- Open UDP / IAX port : 4569

The IAX port is used to allows placing calls from :

- a IAX Soft Phone ([Soft Phone connection](#))
- the test numbers ([Call the test service](#))

If you choice to connect a Voip account to a Telecom provider, you will need to open :

- Open UDP / SIP port : 5060 (take care about the SIP attacks)
- Open UDP / RTP ports : 10000 to 20000

Step 2: Choose an Instance Type
Amazon EC2 provides a wide selection of instance types optimized to fit different use cases. Instances are virtual servers that can run applications. They have varying combinations of CPU, memory, storage, and networking capacity, and give you the flexibility to choose the appropriate mix of resources for your applications. [Learn more](#) about instance types and how they can meet your computing needs.

Filter by: All Instance types Current generation Show/Hide Columns

Step 7: Review Instance Launch
Please review your instance launch details. You can go back to edit changes for each section. Click **Launch** to assign a key pair to your instance and complete the launch process.

Improve your instances' security. Your security group, launch-wizard-1, is open to the world.
Your instances may be accessible from any IP address. We recommend that you update your security group rules to allow access from known IP addresses only. You can also open additional ports in your security group to facilitate access to the application or service you're running, e.g., HTTP (80) for web servers. [Edit security groups](#)

Validate your instance configuration.

You got the Launch status : Instance launching...

 AWS Services Edit

Ulex Innovative Systems Ireland Support

Launch Status

 **Your instances are now launching**
The following instance launches have been initiated: i-30809ba7 [View launch log](#)

 **Get notified of estimated charges**
Create billing alerts to get an email notification when estimated charges on your AWS bill exceed an amount you define (for example, if you exceed the free usage tier).

How to connect to your instances

Your instances are launching, and it may take a few minutes until they are in the **running** state, when they will be ready for you to use. Usage hours on your new instances will start immediately and continue to accrue until you stop or terminate your instances.

Click **View instances** to monitor your instances' status. Once your instances are in the **running** state, you can **connect** to them from the Instances screen. [Find out](#) how to connect to your instances.

▼ Here are some helpful resources to get you started

- How to connect to your Linux instance
- Learn about AWS Free Usage Tier
- Amazon EC2: User Guide
- Amazon EC2: Discussion Forum

While your instances are launching you can also

- Create status check alarms to be notified when these instances fail status checks. (Additional charges may apply)
