

Active a Voxibot Amazon AWS image

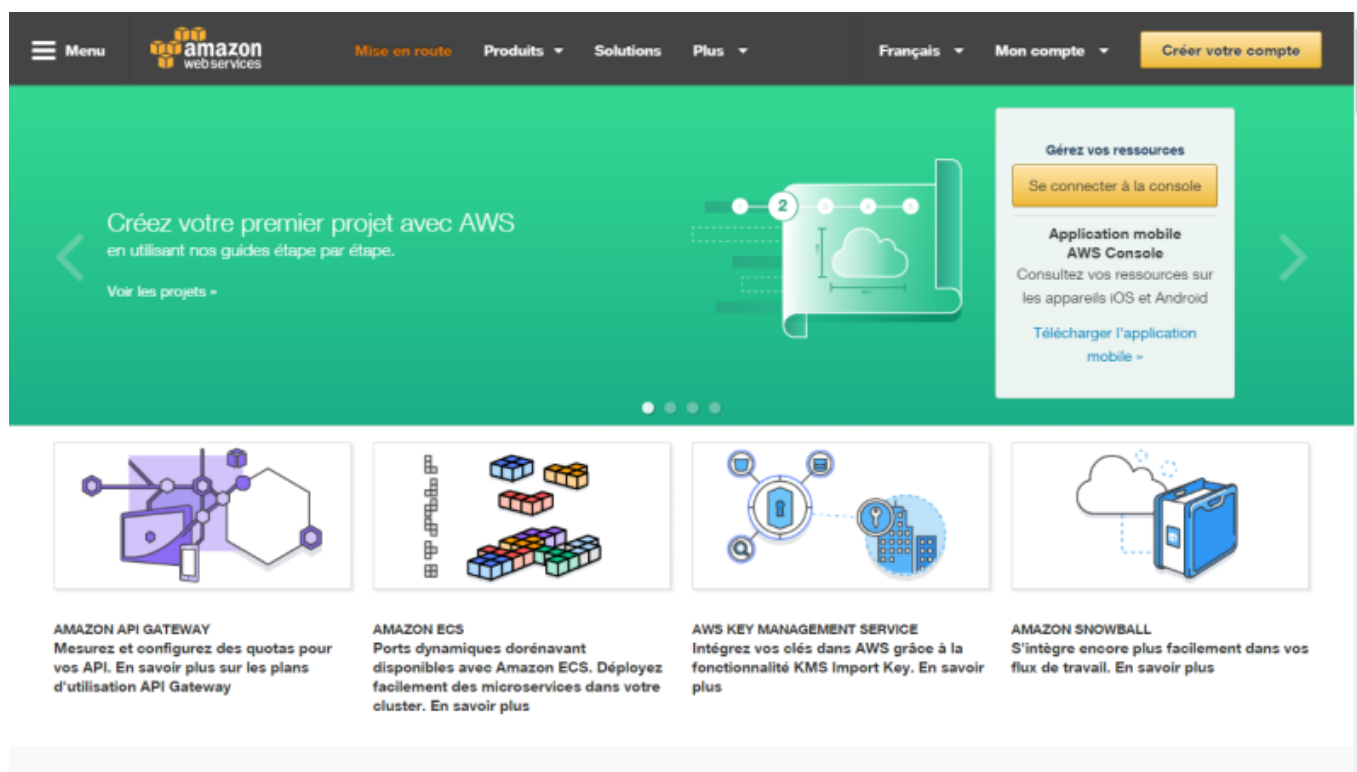

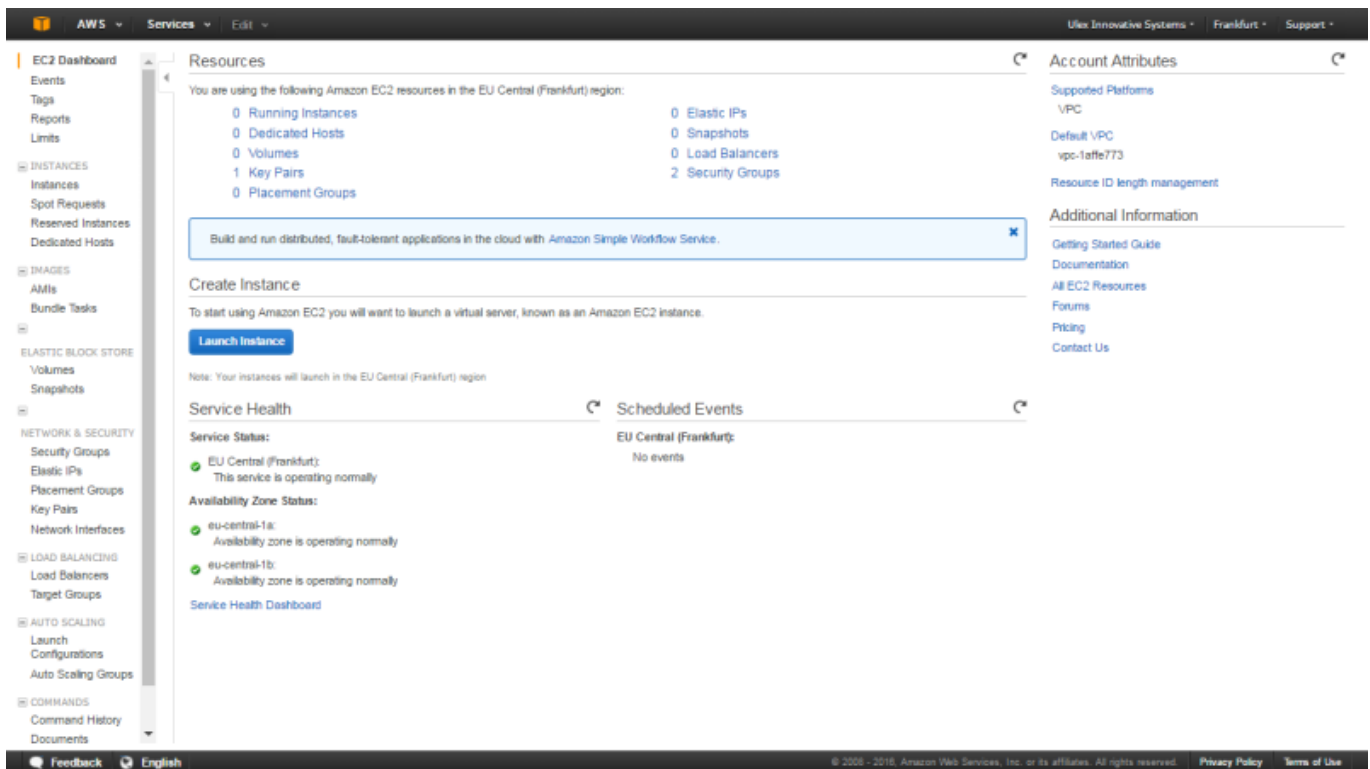

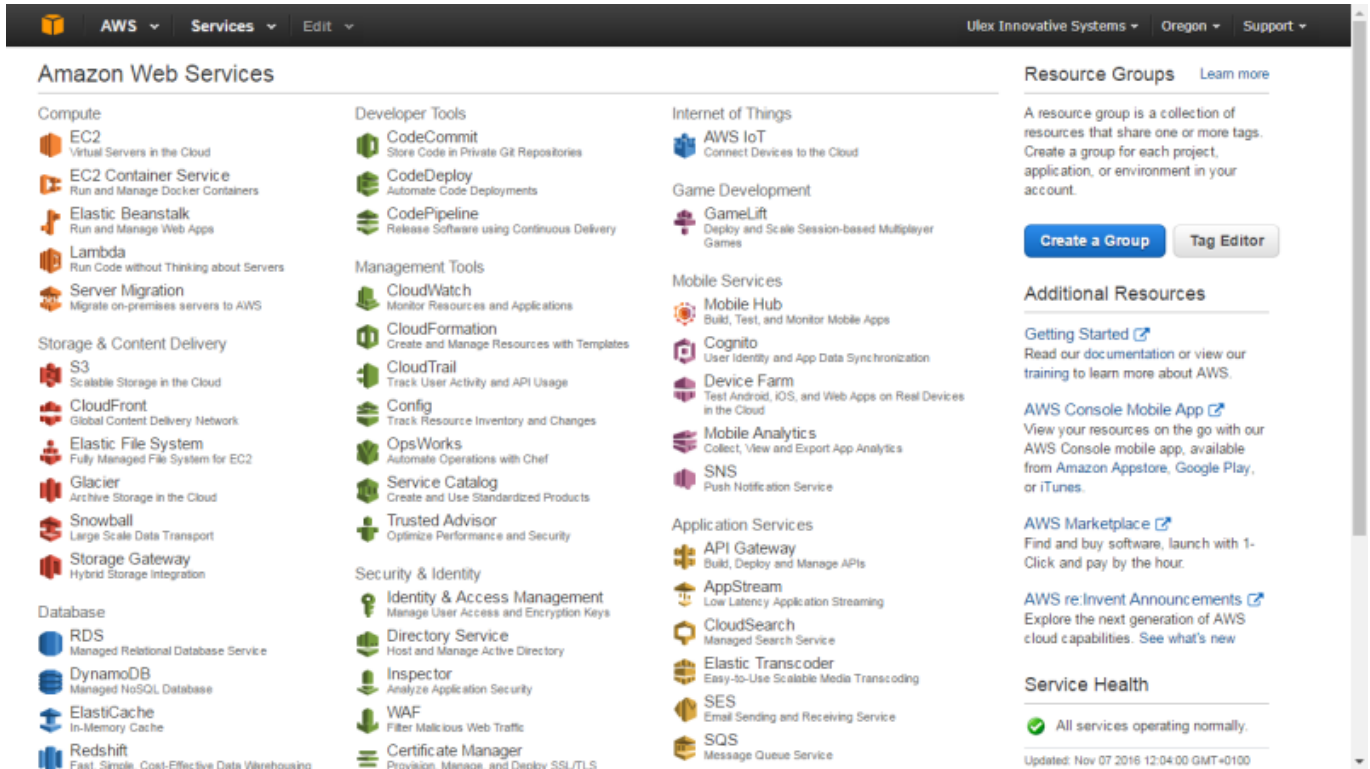

- **Web site** : <https://aws.amazon.com/>

Amazon Web Services (AWS) is a secure cloud services platform, offering compute power, database storage, content delivery and other functionality to help businesses scale and grow. Explore how millions of customers are currently leveraging AWS cloud products and solutions to build sophisticated applications with increased flexibility, scalability and reliability.

More information : [Getting started with AWS](#)

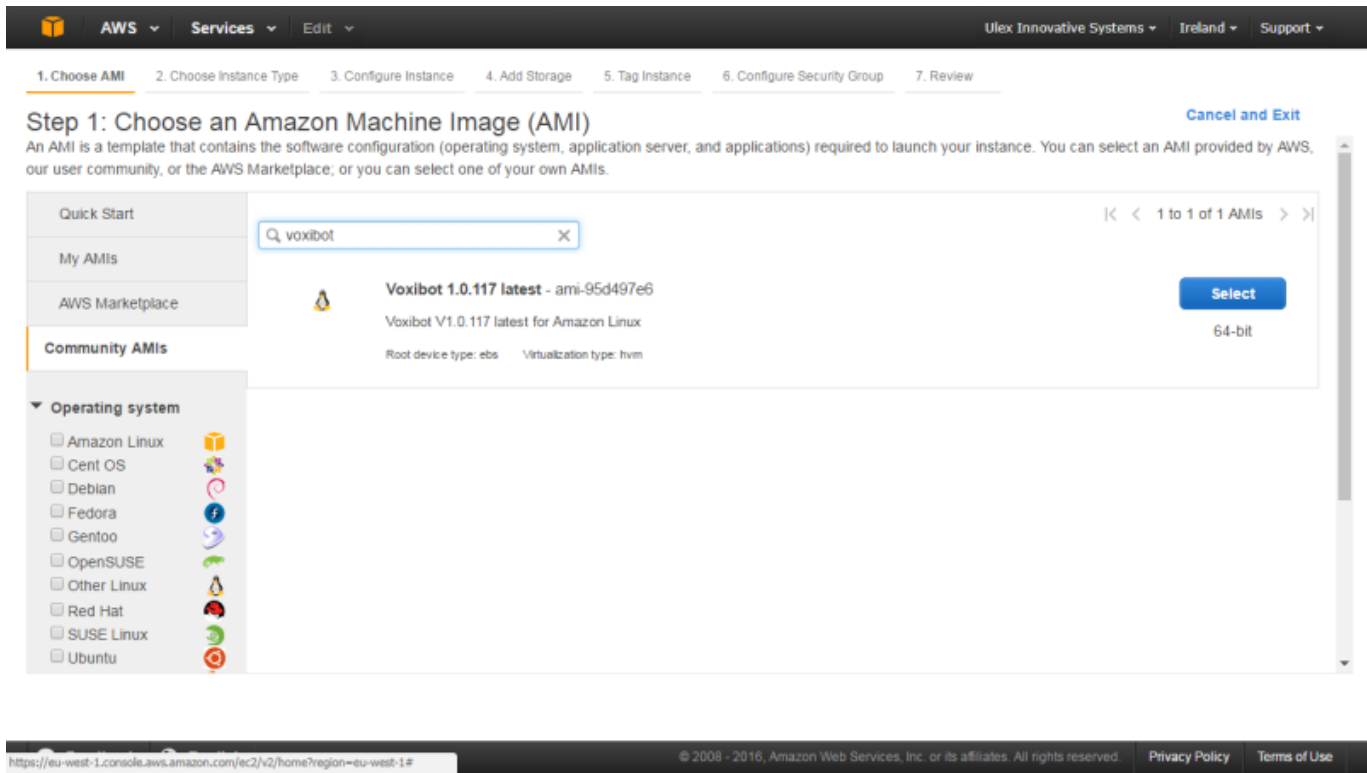

Connect to your AC2 Dashboard

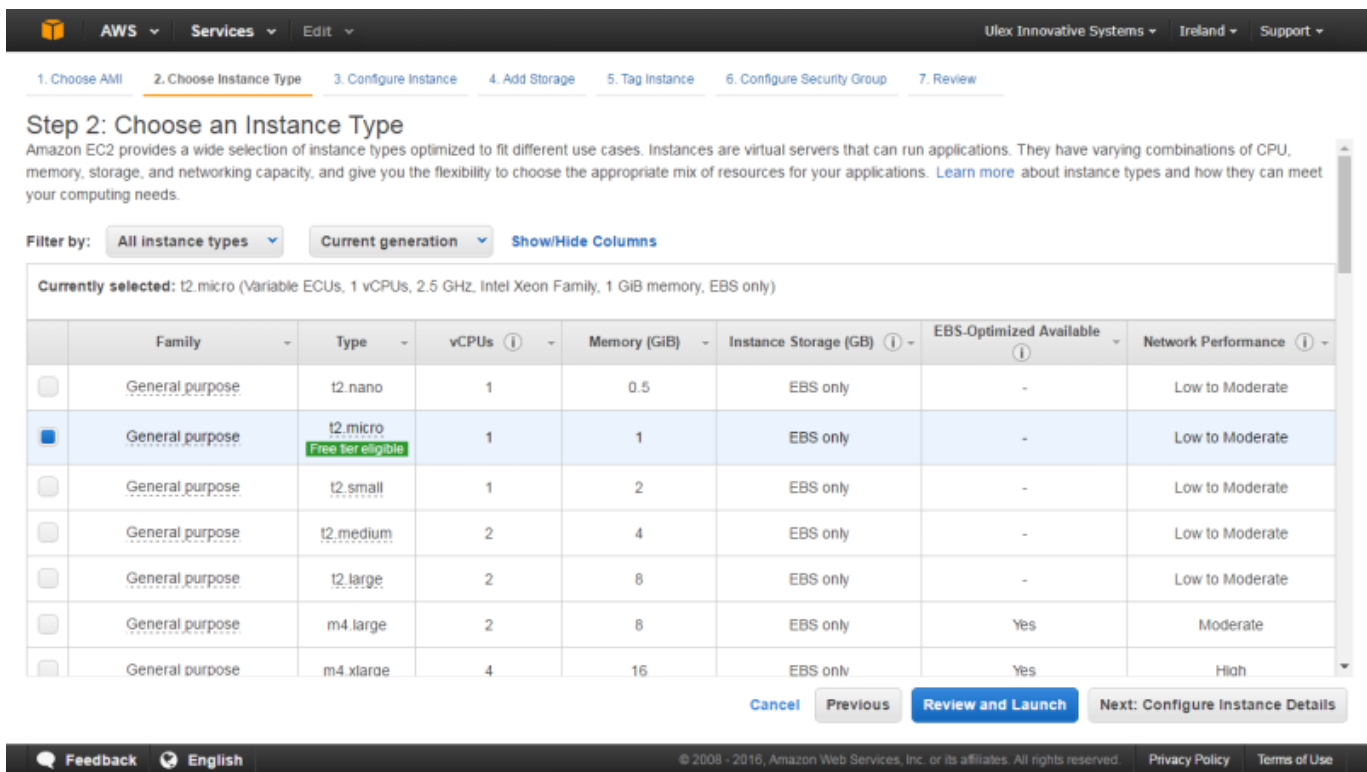

Launch a new instance

- Click the **[Launch Instance]** button.
- Select **[Community AMIs]**
- Enter in the search field : **voxibot**
- Select the latest Voxibot AMI by pushing the **[Select]** button.

Launch next steps

You can skip the fine tune option to directly launch the instance, so you will configure your Security group here are later from the Dashboard :

- Open TCP / SSH port : 22
- Open TCP / HTTP port : 80
- Open UDP / IAX port : 4569

The IAX port is used to allows placing calls from :

- a IAX Soft Phone ([Soft Phone connection](#))
- the test numbers ([Call the test service](#))

If you choice to connect a Voip account to a Telecom provider, you will need to open :

- Open UDP / SIP port : 5060 (take care about the SIP attacks)
- Open UDP / RTP ports : 10000 to 20000

The screenshot shows two screenshots of the AWS Management Console. The top screenshot is 'Step 2: Choose an Instance Type', showing a list of instance types with filters for 'All instance types' and 'Current generation'. The bottom screenshot is 'Step 7: Review Instance Launch', showing a warning about security and details for the 'Voxibot 1.0.117 latest - ami-95d497e6' AMI, 't2.micro' instance type, and 'launch-wizard-1' security group.

Step 2: Choose an Instance Type
Amazon EC2 provides a wide selection of instance types optimized to fit different use cases. Instances are virtual servers that can run applications. They have varying combinations of CPU, memory, storage, and networking capacity, and give you the flexibility to choose the appropriate mix of resources for your applications. [Learn more](#) about instance types and how they can meet your computing needs.

Filter by: **All instance types** **Current generation** [Show/Hide Columns](#)

Step 7: Review Instance Launch
Please review your instance launch details. You can go back to edit changes for each section. Click **Launch** to assign a key pair to your instance and complete the launch process.

Warning: Improve your instances' security. Your security group, launch-wizard-1, is open to the world. Your instances may be accessible from any IP address. We recommend that you update your security group rules to allow access from known IP addresses only. You can also open additional ports in your security group to facilitate access to the application or service you're running, e.g., HTTP (80) for web servers. [Edit security groups](#)

AMI Details [Edit AMI](#)

Voxibot 1.0.117 latest - ami-95d497e6
Voxibot V1.0.117 latest for Amazon Linux

Validate your instance configuration.

You got the Launch status : Instance launching...

The screenshot shows the 'Launch Status' page in the AWS console. At the top, there is a navigation bar with 'AWS', 'Services', and 'Edit' menus, and a user profile for 'Ulex Innovative Systems' in 'Ireland'. The main content area features a green notification box stating 'Your instances are now launching' with a link to 'View launch log'. Below this is a blue information box about estimated charges. The page also includes a section titled 'How to connect to your instances' with explanatory text and a list of helpful resources like 'How to connect to your Linux instance' and 'Amazon EC2: User Guide'. A footer contains 'Feedback', 'English', and copyright information.

This screenshot displays the 'Instances' page in the AWS console. The left sidebar shows a navigation menu with categories like 'INSTANCES', 'IMAGES', 'ELASTIC BLOCK STORE', and 'NETWORK & SECURITY'. The main area shows a table of instances with columns for Name, Instance ID, Instance Type, Availability Zone, Instance State, Status Checks, Alarm Status, and Public DNS. One instance, 'i-30809ba7', is shown in a 'running' state. Below the table, a detailed view for instance 'i-30809ba7' is visible, showing its 'Public DNS' as 'ec2-52-212-253-65.eu-west-1.compute.amazonaws.com' and other details like 'Instance state: running' and 'Instance type: t2.micro'. The footer includes 'Feedback', 'English', and copyright information.

Test your installation

You have two simple ways to test and validate your installation :

- With a soft phone : [Soft Phone connection](#)
- With the test numbers : [Call the test service](#)
