Confiance

- **Web site** : http://confiance.sourceforge.net/

CONFIANCE stands for CONFerencing IMS-enabled Architecture for Next-generation Communication Experience: it is a prototype implementation of the IETF XCON (Centralized Conferencing) framework and of the BFCP (Binary Floor Control Protocol).

Projet is obsolete (based on an Asterisk 1.4.3). We are going to try with the PeopleLink company to port it to the lasts Asterisk.
