

GnuDialer

- **Web site** : <http://sourceforge.net/projects/gnudialer/>

GnuDialer is a complete predictive dialer for contact centers. Written in c++. It's a multi-process OOP. GnuDialer supports inbound, outbound, blended, preview, and auto campaigns. The agent can dispo, hangup, pause, conference and record calls.

- **Our contribution** :

Voximal has forked the GnuDialer project to a more simple Dialer to generate automatic outgoing calls campaign. The Dialer use the Voximal VoiceXML application to interact with the called users.
