

Sirius

- **Web site** : <http://sirius.clarity-lab.org/>

Sirius is an open end-to-end standalone speech and vision based intelligent personal assistant (IPA) similar to Apple's Siri, Google's Google Now, Microsoft's Cortana, and Amazon's Echo. Sirius implements the core functionalities of an IPA including speech recognition, image matching, natural language processing and a question-and-answer system. Sirius is developed by Clarity Lab at the University of Michigan.
