

VoiceXML Example : Simple transfer

Simple transfer (use dialformat configuration)

```
<?xml version="1.0"?>
<vxml version = "2.0" xmlns="http://www.w3.org/2001/vxml">
  <form>
    <block>Hello world!</block>
  </form>
</vxml>
```

The VoiceXML browser will use the TextToSpeech to convert the text "Hello world!" to a synthesis audio prompt.
