

Installation of Voximal

Automated installation using the bundle

In order to install Voximal, you need a Centos 6 64bit server.

Download the latest version of Voximal as a .tar.gz package from:

- [voxibot 1.0.2 \(Jul 3, 2015\)](#)

Then:

1. Unpack the file.
2. Change into the new directory generated.
3. Execute the install.sh script and follow the instructions (generally answer 'y' for each questions).
4. When done, connect to <https://myserver/admin> - you will be asked for login.
5. Login using as user user password user.
