

Install the Voxibot Suite or add the Voximal Module

To install your Voximal application you have 2 ways :

1) From a Linux server

To install the Voximal suite from a new linux server, select the Voxibot suite package. It installs Asterisk/FreePBX/Voxiaml to produce a ready to go Voximal server.

2) From a FreePBX or Asterisk server

To install the Voximal application from a FreePBX or Asterisk server, select the Voximal module. It install the Voximal VoiceXML browser on your Asterisk configuration. If you use the FreePBX interface, you will see a FreePBX module to manage the VoiceXML application from the FreePBX interface (settings, application, logs, status...).
