

Testing call service

You can test your Voximal installation by calling the test numbers from any phone.

We setup 2 phone numbers :

- France : +33(0)9 72 53 88 23
- Unites States : +1-202-600-4534

You need to open the port 4569 from/to the internet. The calls will be transfered by this way to your Voximal server to the number/extension :

- **8965** ('VXML' from your phone dialpad).

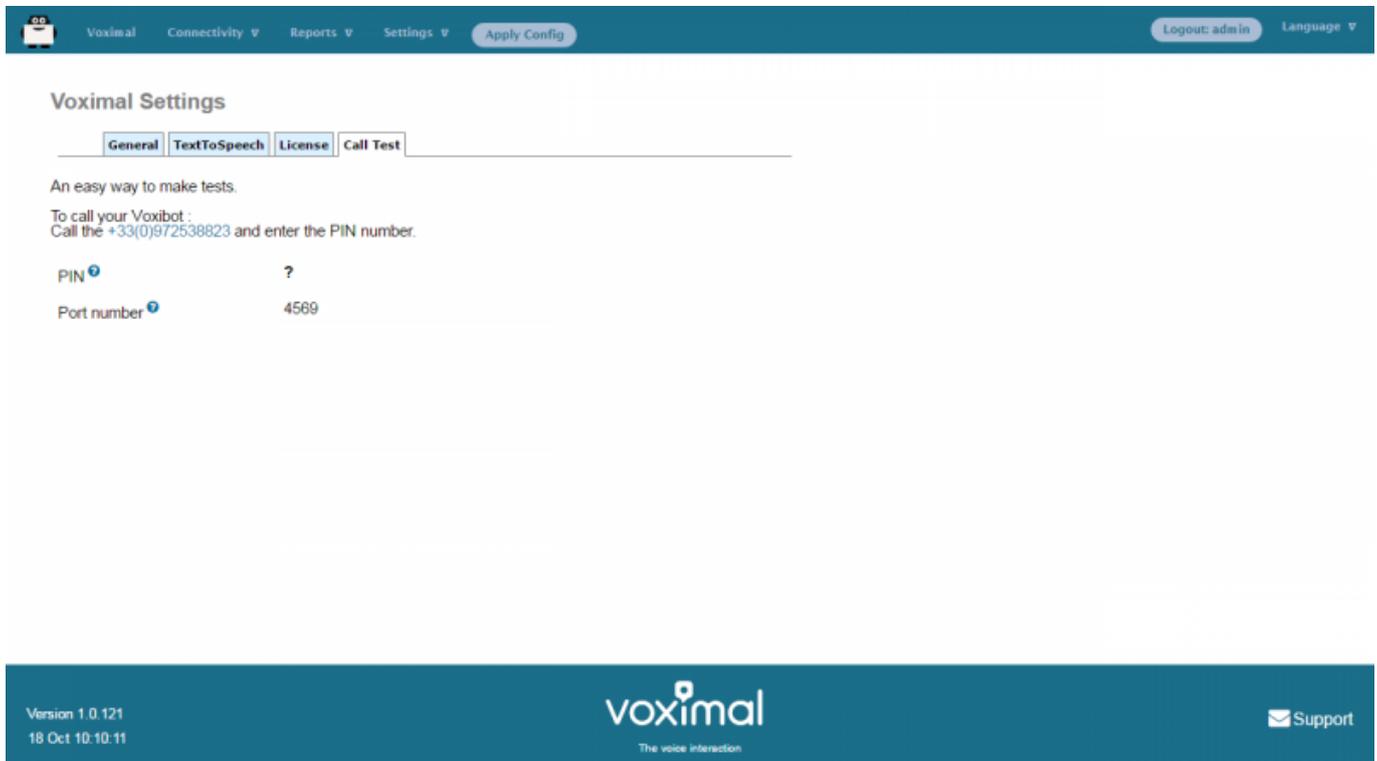

By default, the Voximal installation configures the 'helloworld' service/account that executes this VoiceXML document :

- helloworld.vxml

When you call the voice portal, the service will request your PIN number.

Get you pin from the Web Interface

Select Setting → Voximal Setting → Test

The screenshot shows the Voximal web interface. At the top, there is a navigation bar with links for 'Voximal', 'Connectivity', 'Reports', 'Settings', and 'Apply Config'. The 'Settings' menu is expanded, showing 'General', 'TextToSpeech', 'License', and 'Call Test'. The 'Call Test' tab is selected. Below the navigation bar, the page title is 'Voximal Settings'. Underneath, there are four tabs: 'General', 'TextToSpeech', 'License', and 'Call Test'. The 'Call Test' tab is active. The main content area contains the following text: 'An easy way to make tests. To call your Voxibot : Call the +33(0)972538823 and enter the PIN number.' Below this text, there are two input fields: 'PIN' with a question mark and 'Port number' with the value '4569'. At the bottom of the page, there is a footer with 'Version 1.0.121', '18 Oct 10:10:11', the 'voximal' logo with the tagline 'The voice interaction', and a 'Support' link.

Get you pin from the Asterisk console

Execute :

```
CLI> voximal show license
```
