

Call the test service

You can test your Voximal installation by calling the test numbers from any phone.

We setup 2 phone numbers :

- France : +33(0)9 72 53 88 23
- Unites States : +1-202-600-4534

You need to open the port 4569 from/to the internet. The calls will be transfered by this way to your Voximal server to the number/extension :

- **8965** ('VXML' from your phone dialpad).

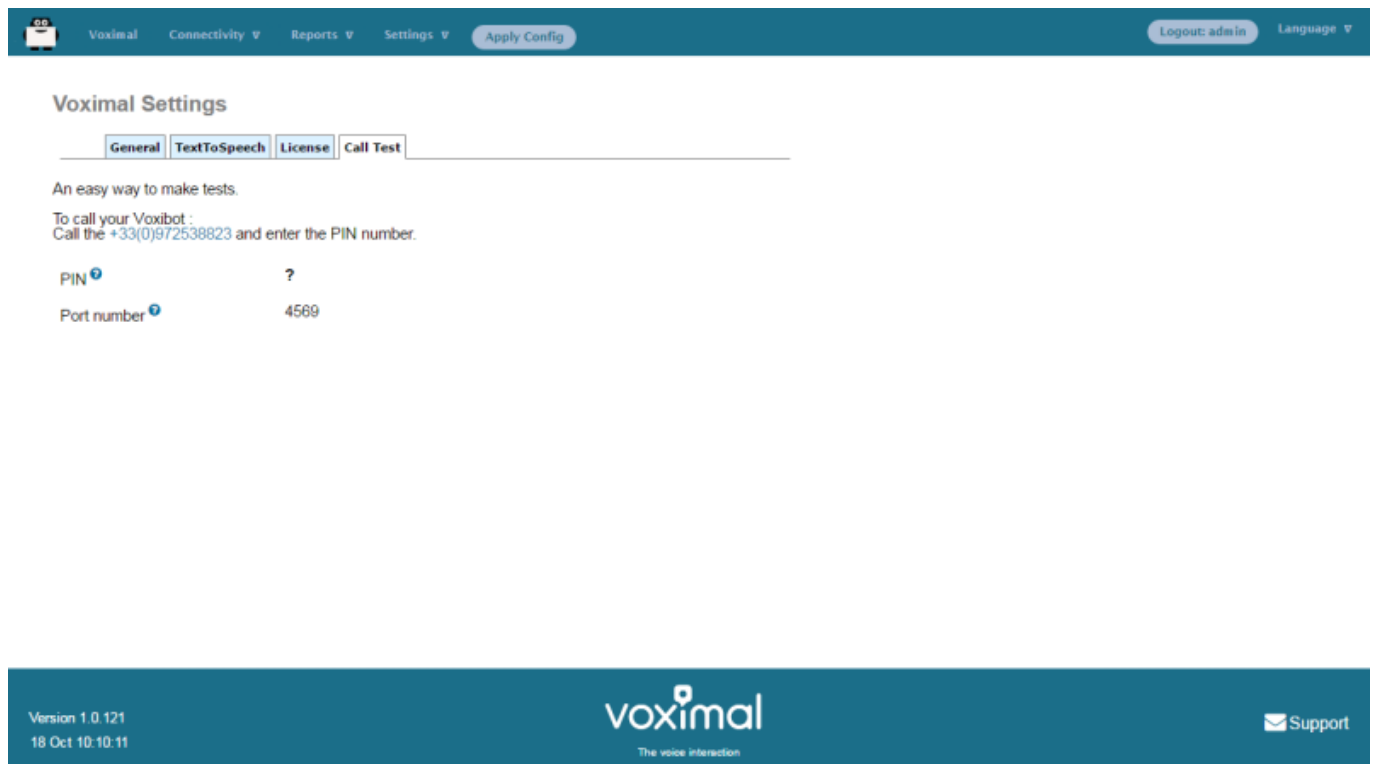

By default, the Voximal installation configures the 'helloworld' service/account that executes this VoiceXML document :

- [helloworld.vxml](#)

When you call the voice portal, the service will request your PIN number.

Get you pin from the Web Interface

Select Setting → Voximal Setting → Test

The screenshot shows the Voximal web interface. At the top, there is a navigation bar with the following items: 'Voximal', 'Connectivity', 'Reports', 'Settings', 'Apply Config', 'Logout: admin', and 'Language'. Below the navigation bar, the page title is 'Voximal Settings'. There are four tabs: 'General', 'TextToSpeech', 'License', and 'Call Test'. The 'Call Test' tab is selected. The main content area contains the following text: 'An easy way to make tests. To call your Voxibot : Call the +33(0)972538823 and enter the PIN number.' Below this text, there are two input fields: 'PIN' with a question mark and 'Port number' with the value '4569'. At the bottom of the page, there is a footer with the following information: 'Version 1.0.121', '18 Oct 10:10:11', the 'voximal' logo with the tagline 'The voice interaction', and a 'Support' link.

Get you pin from the Asterisk console

Execute :

```
CLI> voximal show license
```
