

# Call the test service

You can test your Voximal installation by calling the test numbers from any phone.

We setup 2 phone numbers :

- France : +33(0)9 72 53 88 23
- Unites States : +1-202-600-4534

You need to open the port 4569 from/to the internet. The calls will be transfered by this way to your Voximal server to the number/extension :

- **8965** ('VXML' from your phone dialpad).

By default, the Voximal installation configures the 'helloworld' service/account that executes this VoiceXML document :

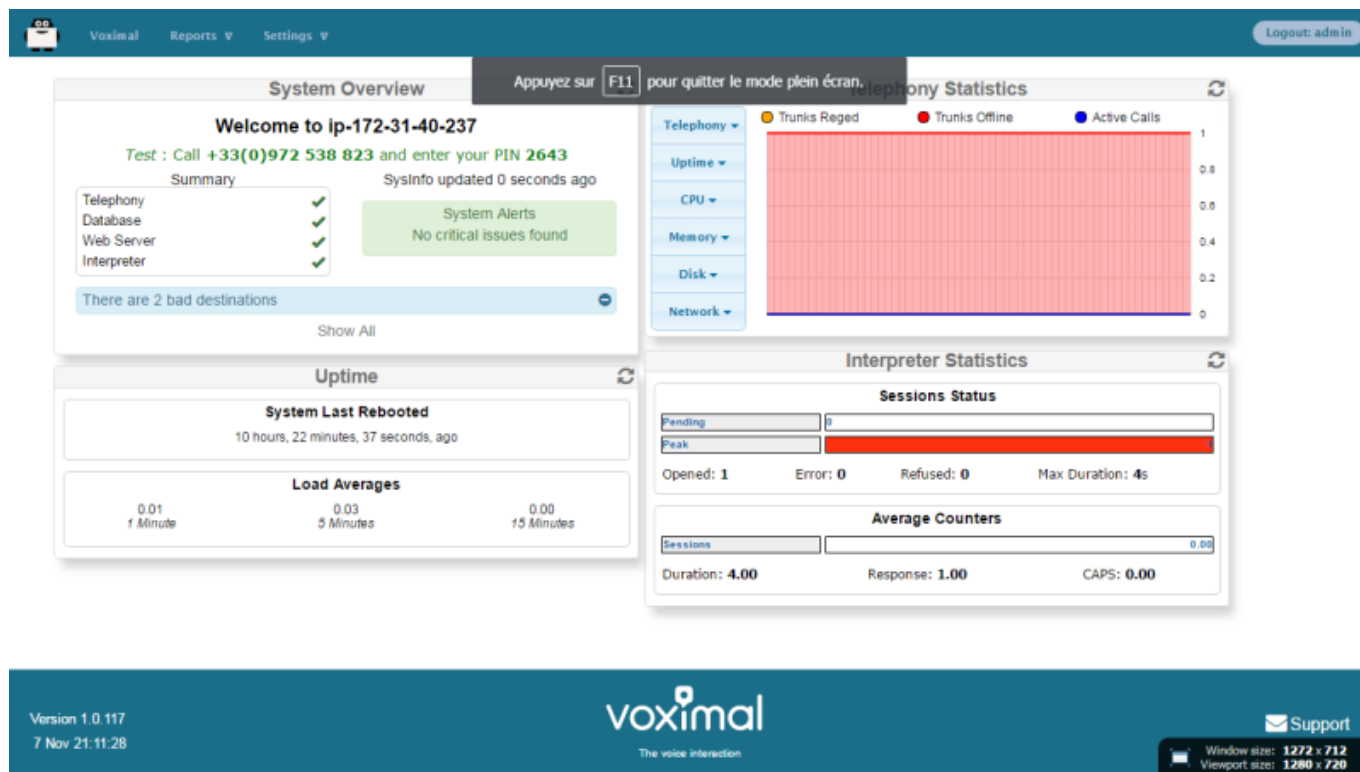

- [helloworld.vxml](#)

When you call the voice portal, the service will request your PIN number.

## Get your PIN from the Web Interface

With the Voxibot suite, the PIN number is prompted the main panel :

**Test : Call +33(0)972 538 823 and enter your PIN XXXX**

With standard FreePBX distribution :

- Select Setting → Voximal Setting → Test

## Get your PIN from the Asterisk console

Execute :

```
raspbx*CLI> voximal show license
