

Call the test service

You can test your Voximal installation by calling the test numbers from any phone.

We setup 2 phone numbers :

- France : +33(0)9 72 53 88 23

You need to open the port 4569 from/to the internet. The calls will be transfered by this way to your Voximal server to the number/extension :

- **8965** ('VXML' from your phone dialpad).

By default, the Voximal installation configures the 'helloworld' service/account that executes this VoiceXML document :

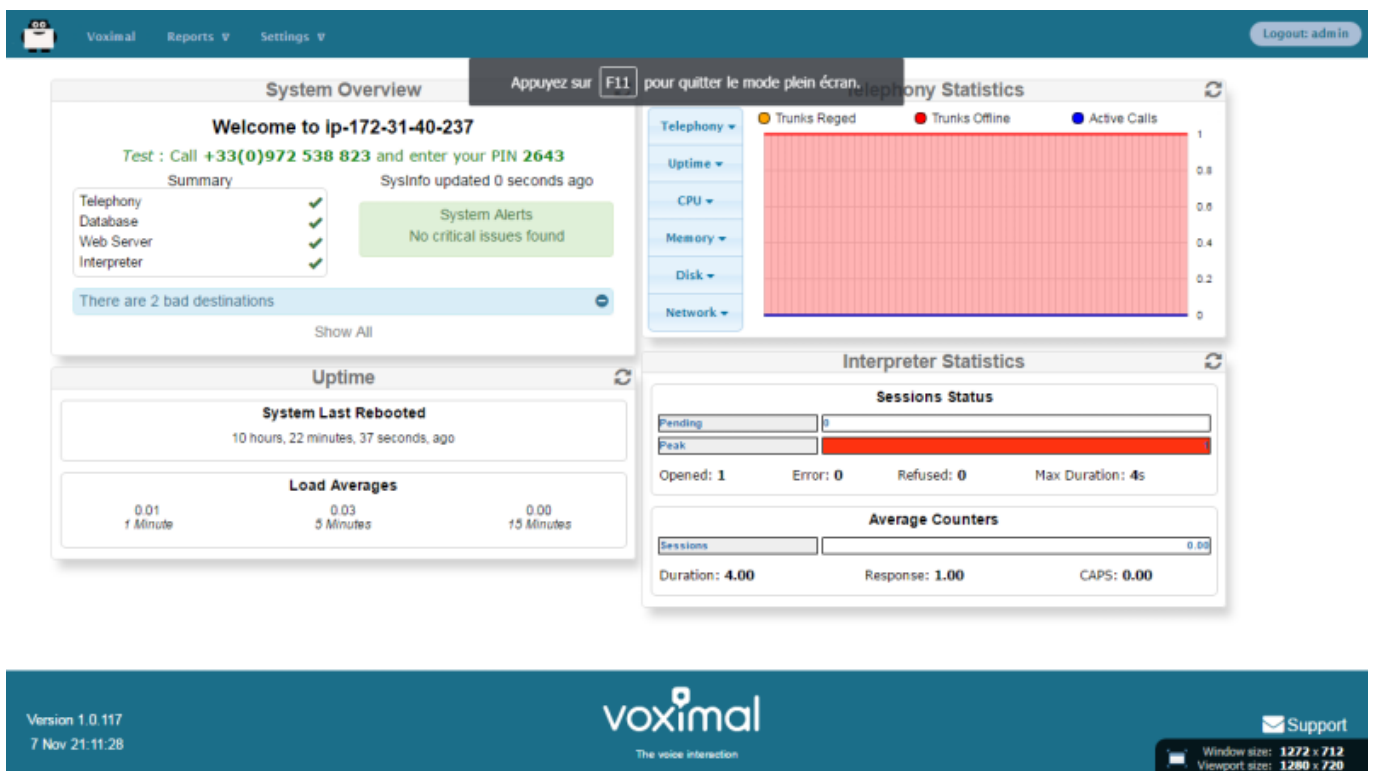

- [helloworld.vxml](#)

When you call the voice portal, the service will request your PIN number.

Get your PIN from the Web Interface

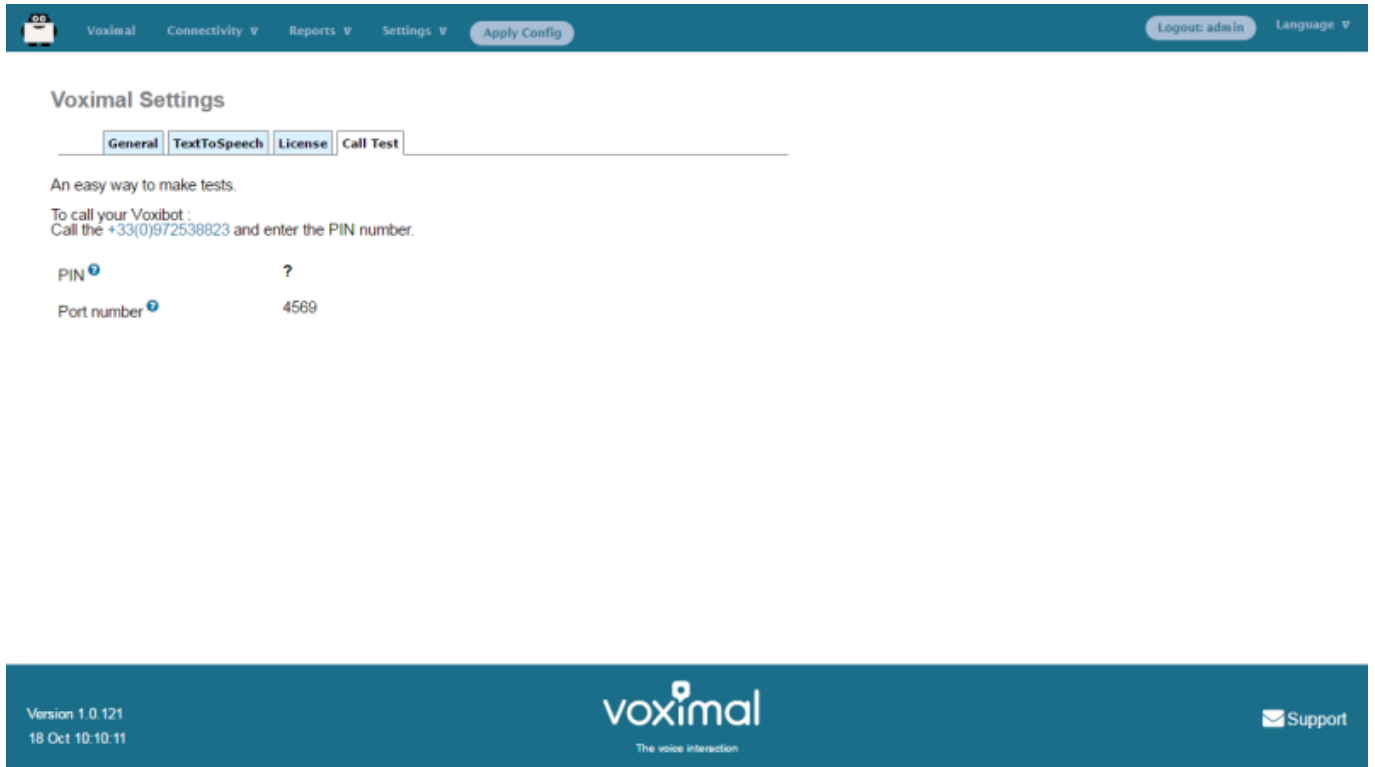

With the Voxibot suite, the PIN number is prompted the main panel :

Test : Call +33(0)972 538 823 and enter your PIN XXXX

With standard FreePBX distribution :

- Select Setting → Voximal Setting → Test

Get your PIN from the Asterisk console

Execute :

```
raspbx*CLI> voximal show license
