# VoiceRSS

- **Web site** : https://www.voicerss.com/

The Voice RSS Text-to-Speech (TTS) API allows conversion of textual content to speech easier than ever. Just connect to our Text-to-Speech (TTS) API with a few lines of code and get verbal representation of a textual content. For converting text to speech you don't need special hardware to care about intensive use of CPU and memory during conversion operations. Voice RSS provides a very human-sounding voices and supports 26 languages.

- **Configuration** :

**voximal.conf**

```
[prompt]
 API : voicerss
 key : (your private key)
```
