

DBL Technology Voip/GSM gateways

- **Web site** : <http://www.dbltek.com/>

DBL Technology Ltd. is a leading company in developing and manufacturing advanced voice over IP (VoIP) solutions for the worldwide market. We are dedicated in the development of the latest VoIP technologies, and more than 10 years in developing a wide range of IP Phones and Gateways. The offering of high quality, innovation, affordability and flexibility inside each and every single one of our products is our commitment to you.

- **Installation** :

- Insert a SIM card and connect the Gateway to your router.
- Call the SIM number and enter *01 to know the IP address.
- Open your web browser and set the IP to access to the configuration interface (the default user/password are admin/admin).

- Set Basic VOIP settings

The screenshot shows the 'SIP' configuration page in the EasyPhone GoIP4 interface. The left sidebar lists various configuration categories, with 'SIP' being the active one. The main configuration area includes fields for SIP mode, phone number, display name, authentication ID, password, SIP proxy, registrar, and registration period. It also features radio buttons for backup server status and routing prefix selection, along with a 'Line 1 Routing Prefix' field and an 'Auto Config Other lines' button. A 'Save Changes' button is positioned at the bottom left of the configuration area.

- Set Call out settings

• **Configuration :**

SIP incoming trunk

```
[general]
Trunk Name: ovh-in (for example)

[Outgoing Settings]

Trunk Name: ovh-in (for example)
PEER Details:
