- **Contact support** : Elastix support

Elastix is an Open Source Software to establish Unified Communications. About this concept, Elastix goal is to incorporate all the communication alternatives, available at an enterprise level, into a unique solution.

Elastix Installation

Here the full Elastix documentation to success your installation : Elsatix documentation

VoiceXML Module installation

The FreePBX integration is only available for **V12** and after VXI* VoiceXML browser releases.

The VoiceXML Browser package install automaticaly the Elastix module (Reports / VoiceXML Logs). But, to install the FreePBX module, you need to finish the installation manualy.

To access FreePBX in Elastix you have to enable Direct access from Security >Advance Setting.

Enable direct access (Non-embedded) to FreePBX : ON

Open the Browser, access URL https://your_pbx_ip_address/admin

After follow the Installation steps details from the FreePBX installation section : VoiceXML Module installation

VoiceXML Module

VoiceXML (Internal Options & Configuration)

VoiceXML (Inbound Call Control)

VoiceXML Log Files

Configuration example
