

Docker

- **Web site** : <https://www.docker.com>

Docker is the original author and primary sponsor of the Docker open source project. Together with the community of maintainers and contributors, Docker aims to deliver open tools to help developers build applications with open APIs to help sysadmins better manage these applications.

The screenshot shows the Docker Hub interface for the `voximal/voxibot` repository. The top navigation bar includes 'Explore', 'Help', a search bar, and 'Sign up'/'Log in' buttons. The repository page is titled 'PUBLIC REPOSITORY' and shows the repository name 'voximal/voxibot' with a star icon and 'Last pushed: 5 hours ago'. The 'Repo Info' tab is selected. The main content area is divided into two columns. The left column contains a 'Short Description' box stating 'Voxibot is a VoiceXML browser using voximal, asterisk and FreePBX as core softwares', a 'Full Description' box with detailed text about the project, and a code block for the Docker run command: `docker run -i -t -p 80:80 -p 4569:4596/udp voximal/voxibot:latest my_init -- bash`. The right column contains a 'Docker Pull Command' box with the command `docker pull voximal/voxibot` and an 'Owner' box showing the 'voximal' user profile. At the bottom, there is a 'Comments (0)' section.

Getting started with Docker

Connect to your docker and execute :

```
# docker run -i -t -p 80:80 -p 4569:4596/udp voximal/voxibot:latest my_init -- bash -l
```
