

Overview

About Voxibot project:

Voxibot is a service that contains several packages and resources can help a customer to launch voice assistant. for their services with high performance and less complicated than voximal. which consumes time to configure it and to reach the voxibot performance. with voxibot solution all resources that customers need are pre-configured. such as TTS/STT engines and telephony trunk, voxibot solution interface does not require pre-experience with IVR to interact and handle services. one of many voxibot features you can connect to chatbot that you want. Ulex Innovative System care about the satisfaction of customers by increasing the performance and facilitate the process, as a result, we made voxibot solution.

Voxibot structure:

It has a unique composition based on the next:

- Voximal [Voximal software](#)
- Asterisk server
- FreePBX
- TTS/STT engines
- telephony trunk

What is chatbot ?

After we talk about Voxibot now we will know how to use it and integrate with chatbot service, before that we can explain what chatbot is.

It is an assistant service that interacts and communicates with users through text messages, voice message, a virtual companion that integrates into websites, applications or instant messengers and helps to get businesses closer to customers. Such a bot is an automated system of communication with users. It is an opportunity for all businesses to increase productivity or transactions with their customers, by facilitating access or response.

Some bots are limited to a group of rules which are already created to respond to specific commands or context. If the condition does not exist then it will not respond to that specific commands.

Why we need chatbot ?

There are factors that motivate and lead people to use chatbots:

- **Productivity.** Chatbots provide the assistance or access to information quickly and efficiently to users.
- **Entertainment.** Chatbots make some fun to people by giving them funny tips, they also help killing time when users have nothing to do.
- **Curiosity.** The novelty of chatbots lead to curiosity. People want to explore their abilities and to try something new.
- **Social and relational factors.** Chatbots enhance social experiences. Chatting with bots also helps to avoid loneliness, gives a chance to talk without being judged and improves conversational skills.

Now after we have fully understood what is voxibot and chatbot we can start how to get them work together.
