

Install the Voxibot Suite or add the Voximal Module

To install your Voximal application you have 2 ways :

1) Voxibot : on a Linux server :

To install the Voximal Suite from a new linux server, select the **Voxibot package**. It installs Asterisk/FreePBX/Voxiaml to produce a ready to go Voximal server.

2) Voximal : over a FreePBX or Asterisk server

To install the Voximal module application on a FreePBX or Asterisk server, select the **Voximal package**. It installs the Voximal VoiceXML browser on your Asterisk. If you use the FreePBX interface, you will see a FreePBX module to manage the VoiceXML application from the FreePBX interface (settings, application, logs, status...).
